- HTML/HTML5
- CSS/CSS3
- JavaScript
- GitHub

## Language

My English is not good, but  
I can read and write.

## Experience

2019 - 2023

### Job position here

- At McDonald's from 2019 to 2020 in the first three months, I trained as a beginner and in the second three months worked as a cashier, worked in the kitchen and worked to prepare orders for customers at the restaurant. In the four months, I played a new coach at the restaurant in an informal way at McDonald's in my city and left work due to study and other special reasons.
- From 2020 to 2021, I once again worked at the McDonald's branch in Abbas Al Akkad for just two months, and I also worked at the Café Superim Restaurant Al Rehab Branch in Mall City Square, serving as Captain of Ordier.
- From 2021 to 2022, I worked in Hurghada at Donatello Cafe. I opened it from scratch for three months and worked as a lounge leader and left because of increased personal expenses and the manager's lack of appreciation for my efforts.
- I also built an e-store like Amazon, Noon and Jumia by a specialist engineer and worked hard on this project with the shipping routes system for eight months but cancelled work on this site because of the differences between me and the engineer and because of my insufficient experience in managing my entire site and downloaded all the files of the site
- From the beginning of 2023 to this time, I went to the front end developer course of websites and now I have studied html and css and now in applying projects to everything I learned in html and css and I will go straight to learning JavaScript.
