Working hard  
under stress

Knowledge of  
internet and  
Servers

## Language

English: A2

Arabic: Good

## Experience

2019 - 2023

### Job position here

- At McDonald's from 2019 to 2020 in the first three months I trained as a beginner and in the second three months I worked as a cashier, worked in the kitchen and worked to prepare orders for customers at the restaurant. In the four months, I played a new coach at the restaurant in an informal way at McDonald's in my city and left work due to study and other special reasons.
- From 2020 to 2021, I worked again at McDonald's Abass Akkad for just two months, and I also worked at Café Supreme Al Rehab in Mall City Square, where I was Captain Ordier.
- From 2021 to 2022 I worked in Hurgada at Donatello Cafe. I opened it from scratch for three months and served as lounge boss and left because of increased personal expenses and the manager's lack of appreciation for my efforts.
- I also built an electronic store such as Amazon, Noon and Jumia by a specialist engineer and I worked on this project with a system of shipping routes for eight months, but I cancelled work on this site because of the differences between me and the engineer and my circumstances of inexperience in managing my entire site and uploading all the files of the site
- From the beginning of 2023 to this time I went to the front end developer course of the websites and now I have studied html, css, javascript and now in applying projects to everything I learned in html and css and I will go straight to fullstack developer learning path.
